project_electron

The `master` branch of this repository contains documentation, code and other project artifacts that we want to keep under version control. See the `gh-pages` branch for the Jekyll hosted at <http://projectelectron.rockarch.org>.

docs

Contains policy, planning and background research documents.

personas

Twelve user personas developed for Project Electron, as well as a template and a CC0 license for these documents.

transfer

Requirements and specifications for the transfer of archival materials from donors to the Rockefeller Archive Center.

user-stories

User stories in CSV files gathered during the discovery phase of Project Electron, as well as a CC0 license.
